# **Qatar Solar Tracking System**

## Overview

---

Ideematec, a leading global supplier of solar tracking systems, on Tuesday announced that its innovative clean technology, the world's largest single-axis solar tracker, will be installed in Qatar's landmark solar facility aimed at helping Qatar meet its target of supplying 10 per cent of peak electricity demand in the country. How big is Qatar's Solar Project?

As one of the largest solar projects globally, it will be developed in two phases and is expected to achieve a total installed capacity of 2,000 megawatts (MW) by mid-2029. Upon completion, the project will double Qatar's solar power generation capacity, significantly contributing to the country's 2030 renewable energy goals.

What is Samsung C&T doing with Qatar's largest solar project?

Samsung C&T secures Qatar's largest solar project, a 2,000MW facility in Dukhan covering 270 with 2.74 million panels, strengthening its leadership in global renewable energy EPC.

How will Qatar's Solar power plant work?

The plant will double Qatar's solar generation capacity, supplying up to 30% of Qatar's total peak electricity demand once complete. It will use a solar tracker system and inverters, capable of operating in high temperatures, to maximise efficiency. The project will be delivered in two phases and is expected to be fully operational by mid-2029.

How will the Dukhan solar plant benefit Qatar?

Upon completion, the project will double Qatar's solar power generation capacity, significantly contributing to the country's 2030 renewable energy goals. Located 80 kilometers west of the capital Doha, the Dukhan Solar Plant will utilize advanced solar tracking systems and high-temperature resistant inverter technology.
