

Qatar has many energy solar sites

Overview

How many solar power plants are there in Qatar?

Qatar has since built two more solar plants in the country: the Ras Laffan and Mesaieed solar plants, which combined generate 875 MW. The newest Dukhan solar power plant is set to be one of the largest in the world. It will be developed in two phases, reaching a total electricity generation capacity of 2,000 MW by mid-2029.

Is Qatar a good country for solar power?

With average daily sunshine of around 9.5 hours, low-cloud cover conditions and plentiful space, there is great scope for small, medium as well as large-scale solar power projects in the country. Qatar's global horizontal irradiance is 2,140 kWh per m² per year which makes it well-suited for solar photovoltaic (PV) systems.

What is Qatar's Solar Energy Future?

Qatar's solar energy future is steadily developing. With average daily sunshine of around 9.5 hours, low-cloud cover conditions and plentiful space, there is great scope for small, medium as well as large-scale solar power projects in the country.

How to develop solar power in Qatar?

Currently, efforts have focused on developing solar capacity in the country through research centers, universities, utilities and pilot projects, and a number of institutions including Kahramaa, Qatar Foundation, QNFSR and QSTP are actively working on this front.
