Recommended UPS for mining in Albania

Overview

Which companies are famous for copper mining in Albania?

Tete-Mine is another famous company for copper mining. It has successfully generated 3.6 million tons of copper in 10 years. Tete company began its association with the Albanian government around 23 years ago. Furthermore, the Yildirim group is also a major stakeholder in the minerals and mining sector in Albania.

How has the mining industry progressed in Albania?

The development of the mining industry in Albania has progressed through three primary phases. The initial phase extends from the early years up to the conclusion of World War II, marked by two noteworthy milestones.

Are ups suitable for electrical installations at mine sites?

risks may be created by arcing, fire, fumes or acids/chemicals associated with the batteries. Not all UPS installations are suitable for connection to electrical installations at mine sites. Specialist consultants should be involved in the design of the installation to ensure the application is fit for purpose.

Should mine operators have their ups installed audited?

Mine operators should consider having their UPS installations audited by a suitably qualified engineer as part of routine planned maintenance. Any installations found not to conform to the UPS design requirements must be actioned appropriately by the mine to ensure the installation provides for the necessary level of safety.

Recommended UPS for mining in Albania

Power supplies & UPS for mining , Phoenix Contact

Power supplies and UPS in the mining industry Avoid costly failures Power failures can result in costly production losses and can also cause severe damage. The power supply devices, ...
