Reykjavik hybrid solar power plant

Overview

Is Reykjavik Energy a suitable partner for space solar?

“Reykjavik Energy’s focus on climate technology, along with its experience in carbon storage through Carbfix and partnership with Climeworks, makes it a suitable partner for the initial phase of Space Solar’s project,” said Kjartan Örn Ólafsson, CEO of Transition Labs.

How many homes will a solar project power in Iceland?

The project, a collaboration between Iceland’s sustainability initiative Transition Labs and UK-based Space Solar, is expected to power 1,500 to 3,000 homes. Solar panels against the cityscape of Reykjavik in Iceland iStock/powerofforever.

Could Iceland become the first country to harness solar power from space?

In a move that could revolutionize how the world harvests energy and reduce dependence on non-renewable sources, Iceland could become the first country to harness solar power from space.

Where can solar power be installed in Iceland?

The first publicly connected solar power installation in Iceland is on the remote island of Grímsey, which has a 12 kW photovoltaic system installed in 2022. As of 2025, there are plans to install a solar power system paired with a battery storage system on another off-grid island, Flatey.
