## Overview

---

Can I get a solar panel in a custom shape?

Yes, it is possible to get a solar panel in a custom shape. At Voltaic, we manufacture both standard and custom small solar panels, with most being rectangular, but we have experience designing and deploying a full range of interesting shapes and sizes.

What is a rectangular solar panel?

The iconic image of a solar panel often consists of a rectangular configuration. This timeless design has been the foundation upon which solar installations have thrived globally. Its simplicity belies its effectiveness, offering a pragmatic solution for capturing solar energy.

What is the difference between a rectangle and a landscape solar panel?

While rectangles form the core of solar panel design, their orientation carries profound implications for energy capture. Portrait and landscape orientations offer distinct advantages based on available space and energy requirements. When space is limited, portrait-oriented panels excel.

Can you get solar panels in different shapes?

Yes, absolutely! While the traditional rectangular shape is common, solar panels now come in various shapes beyond the conventional. Triangles, circles, and hexagons are innovative shapes that offer functional efficiency and aesthetic appeal. What is the most efficient solar panel shape?
