

Riga Energy Storage Power Station 60MW

Overview

Does Rolls-Royce have a battery storage system in Latvia?

Rolls-Royce has received an order from the Latvian transmission system operator Augstspreguma tikls (AST) to supply an mtu large-scale battery storage system to secure the Latvian power grid. In 2025, Latvia, together with the other Baltic states, will synchronize its energy supply system with the continental European power grid.

Does Latvenergo offer battery energy storage systems?

Share. Latvenergo, a prominent public electricity utility in Latvia, has invited a tender for the procurement of Battery Energy Storage Systems (BESS).

Why do we need a battery system in Latvia?

The battery system is an essential infrastructure element for the security and stability of Latvia's energy supply. The batteries will work as modern accumulators for storing large volumes of energy, which will be important for ensuring energy balance once the Latvian electricity supply grid works in sync with the European grid.”.

Will Estonia build a 200MW power system in 2025?

Image: Evecon. Bids have been received by Latvia's grid operator AST for an 80MW/160MWh BESS project while developers Corsica Sole and Everon will build a 200MW system in Estonia, as the Baltic region prepares to decouple from Russia's electricity system in 2025.
