

EQACC SOLAR

Romania plant solar container energy storage system brand

Overview

How much storage capacity will Romania have in 2025?

This single project will double Romania's current installed storage capacity of 398.8 MWh, a figure that comes from transmission system operator Transelectrica, and mentioned by Romania's energy minister Sebastian Burduja in April, 2025.

What is Romania's largest battery project?

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in Florești, Cluj county, which is expected to be operational by the end of 2025.

Does Romania have a double taxation of stored electricity?

Romania's National Energy Regulatory Authority (ANRE) recently eliminated the double taxation of stored electricity. The new rules exempt electricity stored and then reinjected into the grid from several tariffs, removing a significant financial barrier for investors.

How is Romania transforming the European energy landscape?

The investment wave, supported by key regulatory changes, is elevating Romania in the European energy landscape. Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date.

Romania plant solar container energy storage system brand

Spotlight on Romania: The 600 MWh battery storage boom

Nova also suggested that by 2028, the company plans to install energy storage systems of up to 600 MW / 1,200 MWh overall, supporting its gas power plants. Meanwhile, ...

Econergy expands hybrid solar and storage portfolio in Romania

Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The aim is to consolidate and expand its position in ...
