Rome Airport uses 120kW photovoltaic container

Overview

Where is Aeroporti di Roma's new solar farm located?

Aeroporti di Roma (ADR) today inaugurated its new solar farm, which instantly becomes one of the largest photovoltaic systems in the world within an airport perimeter. The solar farm is located along the eastern side of Runway 3 at Rome Fiumicino Airport.

Why is Aeroporti di Roma launching a solar farm at Fiumicino Airport?

“Aeroporti di Roma’s solar farm at Fiumicino airport represents an important milestone, especially considering the urgent further development in terms of capacity – for an infrastructure committed to energy efficiency and environmental sustainability.

Why is Aeroporti di Roma important?

While Gilberto Pichetto Fratin, Italy’s Minister of Environment and Energy Security, said: “The air transport sector offers several opportunities for research and development of innovative solutions for decarbonization, and Aeroporti di Roma has been at the forefront of this valuable endeavour for years.

How much solar power will the airport have in the next 5 years?

According to ADR, this launch represents a first, significant step towards the airport reaching an installed power of 60 Mwp in the next 5 years, with the installation of additional solar farms within the perimeter of the current area.
