

EQACC SOLAR

Senegal Ig solar container lithium battery cylindrical

Overview

What battery size does LG Energy Solution offer?

LG Energy Solution has increased the battery sizes and is currently developing the 46-series battery. The 46-series offers 46 mm in diameter and a wide range of height (80 mm - 120 mm), further expanding the application of cylindrical batteries. * LEV: Light Electric Vehicles. They include electric bikes, scooters, and wheelchairs.

Does LG Energy Solution use NCM based cathode materials?

LG Energy Solution uses NCM-based cathode materials that allow high-capacity energy storage. We became the world's first to mass-produce batteries consisting of NCM 523 cathode materials for electronic devices in 2007 and have been producing batteries consisting of NCMA cathode materials with a nickel content of at least 85% since then.

When did LG start developing lithium-ion batteries?

LG Energy Solution began its research on lithium-ion batteries in 1992. It launched the development of lithium-ion batteries in 1996 and entered into the battery market with the first mass-production of laptop batteries in 1999. Batteries have been adopted for a variety of applications ever since.
