

EQACC SOLAR

Seychelles Energy Storage Power Station Operation and Maintenance Company

Overview

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

Why is the PUC planning a power transition in Seychelles?

For the next four to five years, the PUC has carefully scheduled this transition in order to guarantee a stable energy supply that can sufficiently sustain the nation's economy. Seychelles currently has a total power generation capacity of 129MW, mostly produced by PUC, through its diesel power plants and solar farms.

What is the Seychelles energy plan?

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé, Praslin and La Digue), aiming at replacing diesel generators with domestic and international public and private financing.
