

**EQACC SOLAR**

# **Singapore Energy Storage Power Supply Factory**

## Overview

---

When will Singapore's energy storage system be completed?

EMA's director of industry development Jeanette Lim said that the energy storage system had to be completed by December last year in order to provide energy, reserves and regulation services to enhance Singapore's grid resilience, to manage any protracted market and energy supply volatility.

Does Singapore need energy storage systems to manage solar intermittency?

However, the minister said there is a need to "step up energy storage systems to manage solar intermittency." Talks are currently ongoing with Sembcorp, the engineering conglomerate behind the 200MW/285MWh battery energy storage system (BESS) installation on Singapore's Jurong Island.

What is Singapore's first utility-scale energy storage system?

Singapore's First Utility-scale Energy Storage System Through a partnership between EMA and SP Group, Singapore deployed its first utility-scale ESS at a substation in Oct 2020. It has a capacity of 2.4 megawatts (MW)/2.4 megawatt-hour (MWh), which is equivalent to powering more than 200 four-room HDB households a day.

What is a battery energy storage system?

Battery energy storage systems (ESS) provide critical frequency and stability support to power grids. As one of Asia's largest battery operators, our energy storage portfolio is well-positioned to support the evolving needs of power markets as they increase their uptake of renewable energy. The Sembcorp Energy Storage System was launched in 2023.
