

EQACC SOLAR

Single crystal double glass perc solar panel

Overview

What is PERC monocrystalline solar panel?

PERC monocrystalline solar panel is the latest technology and powerful solar panel. It uses PERC cells which are considered to be the latest invention in the solar field. PERC stands for Passivated Emitter and Rear Contact.

Are double glass solar panels bifacial?

There are frameless, double glass solar panels, exposing the rear of cells, but not bifacial. True bifacial panels have contacts/busbars both on the front and back of the cells. Double glass solar panels with advanced PERC technology, half-cell and frameless design enable lower degradation, high power and longer life.

Are double-glass solar panels a good choice?

Compared with ordinary glass solar panels that only cover the front, double-glass solar panels are proven to be more reliable and durable, and weatherproof deployed in extreme environments under high temperature, high humidity, windy, salt-alkali, or drought conditions, such as Coastal frontiers, fishing grounds, and deserts.

What are Coulee double-glass solar panels?

Coulee double-glass solar panels can be designed and produced in various dimensions with different numbers of cells (36, 48, 60, 72 cells, etc.). Allows adjusting the light transmission and shading level inside the building by regulating the solar cells' distance during the production process.

Single crystal double glass perc solar panel

Double Glass Solar Panels Half Cell Mono PERC Panel

Double glass solar panels with advanced PERC technology, half-cell and frameless design enable lower degradation, high power and longer life.
