

## EQACC SOLAR

# Single solar panel specifications

### DETAILS AND PACKAGING

① USER MANUAL PDF

② RJ45 Cable For RS485/CAN

③ Battery in Parallel Cables

④ RJ45 TO USB Monitor Cable

⑤ M8 Terminal\*4

## Overview

---

What are the key specifications of solar panels?

The article covers the key specifications of solar panels, including power output, efficiency, voltage, current, and temperature coefficient, as presented in solar panel datasheets, and explains how these factors influence their performance and suitability for various applications.

What are the standardized sizes of solar panels?

There are three standardized sizes of solar panels: 60-cell, 72-cell, and 96-cell. The dimensions of 60-cell solar panels are 66 inches long and 39 inches wide (66×39), while 72-cell solar panels have dimensions of 78 inches long and 40 inches wide (78×40). The 96-cell solar panel size is not mentioned in the passage.

What are the dimensions of a 96-cell solar panel?

96-cell solar panel size. The dimensions of 96-cell solar panels are 41.5 inches long and 63 inches wide. That's a 41.5×63 solar panel.

What is the typical thickness of solar panels?

Most solar panels are about 1.5 inches thick. The thickness (depth or height) is the only dimension that varies slightly among different solar panel models. The length and width of typical solar panels, along with their wattage and area or square footage, are also important factors to consider.
