

EQACC SOLAR

Slovakia solar Energy Storage Agent

Overview

This article ranks leading integrators, explores market trends, and reveals how companies like SunContainer Innovations deliver turnkey solutions for industrial and residential projects. Who is Slovak solar?

Slovak Solar s.r.o. is a leading photovoltaic wholesaler in Slovakia, Czech Republic and Austria, with a vision to create a sustainable energy future. We started our journey in 2009 with the main idea – to provide companies specialised in the installation of solar systems with access to first-class photovoltaic products, all from one place.

Why should you choose Slovak solar?

At Slovak Solar, we believe that progress comes from constant innovation. From day one, we've been breaking new ground in Slovakia's solar energy sector. We were one of the first company in Slovakia to install Building-Integrated Photovoltaics (BIPV).

How has solar technology changed in Slovakia?

For the second consecutive year, Slovakia has witnessed notable acceleration in the solar PV sector. This growth has been primarily driven by the declining cost of solar technology, coupled with relatively high energy prices faced by businesses, which has increased interest in PV systems.

How many solar PV plants are there in Slovakia?

There are currently 479 utility-scale ground-mounted solar PV plants with almost 586 MW of installed capacity and 528 MW of rooftop PV systems in Slovakia. The largest solar PV plant to-date was commissioned in 2024 in the municipality of Iliašovce (Košice Region) with installed power at 6.3 MW.
