Small household flow battery

PUSUNG-R (Fit for 19 inch cabinet)

Overview

What is a flow battery?

The development of this new flow battery marks a significant milestone in energy storage technology. Unlike conventional batteries, this high-current density, water-based battery is designed for residential use, allowing households to store solar energy more effectively.

Are flow batteries good for home use?

Existing flow batteries, while effective, tend to be large and slow, limiting their use to large-scale applications. The Monash University design, however, overcomes these limitations, offering a compact and fast solution suitable for home use.

Could a water-based flow battery transform the energy landscape?

In a groundbreaking development poised to transform the energy landscape, scientists have unveiled a revolutionary water-based flow battery that promises safer, more affordable, and efficient energy storage for households, marking a significant leap forward in the quest for sustainable power solutions.

What is a vanadium flow battery?

Vanadium flow batteries are ideal for powering homes with solar energy. Compared to lithium batteries, StorEn's residential vanadium batteries are: Homes with solar panels need batteries to store energy collected during peak sun times so it can be used later, when it's dark, overcast, or during inclement weather.

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
