# Solar Bus Station Control System

✓ 50KW/100KWH

✓ HIGHER POWER OUTPUT  
IN OFF-GRID MODE

✓ CONVENIENT OPERATION  
& MAINTENANCE

✓ PRE-WIRED

## Overview

---

With an optionally single or double-sided monitor of IP67-protection class, an ultra-low power consumption 10.1" Electronic Paper Display, a solar panel, and a long-lasting battery, the weatherproof and durable terminal system can be adapted for indoor and outdoor use at bus or train stations. What is the route of the solar-powered bus?

The bus equipped with solar panels currently runs twice a week from Dortmund to London. The solar panels installed on the bus are used to keep the battery charged: all on board equipment is then powered by solar energy.

How does a solar bus station work?

A flexible solar panel is installed on the top of the solar bus station, which can generate electricity for self-use. At the same time, the bus station is equipped with various high-tech facilities, with real-time vehicle arrival forecast, LCD touch electronic screen, wireless WIFI and other functions to meet the needs of citizens.

Are solar-powered bus stops a sustainable urban innovation?

Several European cities have successfully implemented solar-powered bus stops, demonstrating the practical benefits of this sustainable urban innovation. In Barcelona, Spain, a network of 100 solar bus stops installed in 2019 now powers digital displays, USB charging ports, and LED lighting while generating excess energy for the city grid.

What is a solar-powered bus stop?

With integrated weather sensors, emergency communication systems, and adaptive lighting, solar-powered bus stops represent the intersection of sustainable design and practical urban planning, setting new standards for public infrastructure development.

## Solar Bus Station Control System

---

### Solar for Bus & Railway Terminals

Solar energy solutions are revolutionising the way bus and rail stations operate by enabling cleaner, more efficient transit infrastructure. Through the strategic deployment of rooftop and ...
