

EQACC SOLAR

Solar Dual Pump System

Overview

What is a solar dual pump?

The solar dual pumps is an innovative pump designed to utilize the power of the sun during the day and act as a normal hand pump when the solar energy is not available, hence assuring uninterrupted water supply for drinking, sanitation, personal hygiene etc.

What is a Multiflow hybrid solar pump?

Explore MultiFlow Hybrid Solar Pumps, an AC/DC hybrid solution that uses both solar and AC power sources to pump water from boreholes.

What is a Multiflow AC/DC Hybrid pump?

The Multiflow AC/DC Hybrid pump range offers a versatile solution for your water pumping needs. These pumps work seamlessly with both solar (DC) and grid/generator (AC) power sources. This dual capability ensures you have a reliable water supply, regardless of the weather.

How does a Multiflow water pump work?

These pumps work seamlessly with both solar (DC) and grid/generator (AC) power sources. This dual capability ensures you have a reliable water supply, regardless of the weather. On sunny days, the Multiflow pump uses solar energy to efficiently pump water, reducing your reliance on the grid and lowering energy costs.

Solar Dual Pump System

Solar Dual Pump System , Jal Jeevan Mission Scheme

What is solar dual pumping system? The Solar Dual Pump is devised to utilize solar energy during day and store water in an overhead tank, which can be accessed throughout the day and act ...
