# Solar Energy System Application in Iraq

## Overview

---

Can solar energy be used in Iraq?

In this review, solar applications are studied for the production of heat and electricity and the possibility of using them in Iraq. From reviewing the many references that have worked in this field, it is clear that Iraq is ready to use solar energy in applications of heating water for domestic use.

What is the solar radiation in Iraq?

The solar radiation in Iraq is not less than 265 W/m<sup>2</sup> in winter, which is a high intensity that gives high heating temperatures and suitable for this application .

Why is Iraq a good country for solar water distillation?

Iraq is an ideal country for solar water distillation applications because it enjoys a good radiant energy throughout the year. Simple solar distillates are characterized by low productivity and need for large areas exposed to solar radiation.

Is Iraq a solar country?

Iraq is located near the solar belt, which receives a quantity of solar radiation with an average of (6.5-7) kilowatt-hours per square meter. The periods of sun brightness range from 2800 to 3300 hours per year. This gives Iraq the necessary qualifications for the exploitation of solar energy .

## Solar Energy System Application in Iraq

### Solar Power System Solution for Iraq Authors: Abdullah ...

Long-Term Vision (2036 and Beyond): Transition to a fully integrated solar power system, with continued innovation in technology, energy storage, and grid management, positioning Iraq as ...
