Solar Room System

Overview

What is a solar room ®?

The Solar Greenhouse System The Solar Room® when mounted on the south, southeast, or southwest sides of a home, is a solar collector in addition to being a greenhouse. It is a gold anodized extruded aluminum frame which bolts together erector set fashion. It is then bolted to a wood beam or cement foundation and the wall of the house.

What is a solar home system?

The term solar home system, and its acronym SHS, refers to a stand-alone system, suitable for residential applications, such as home appliances, lighting, computers and water pumps. Normally, the SHS is low power, less than 100 W . The SHS is generally designed and sized to supply DC and/or AC electrical appliances.

What is a solar room kit?

The Solar Room Kit by High Planes is a testament to the company's commitment to making renewable energy accessible to more people. Unlike traditional solar setups, which often involve significant home modifications and a hefty upfront investment, the Solar Room Kit simplifies the transition to solar power.

How termodizayn solar-powered container type cold storage works?

You can store your products 24/7 regardless of the grid power anywhere you like with Termodizayn solar-powered container type cold storages. With container type cold rooms operating with solar energy, you can easily solve cold storage problems and post-harvest loss problems in perishable foods such as fruits, vegetables, meat and meat products.
