

**EQACC SOLAR**

# **Solar container energy storage system in Canada**

## Overview

---

What is Canadian Solar doing with its energy storage product portfolio?

Canadian Solar continues to focus on its energy storage product portfolio. E-STORAGE, which is part of the company's majority-owned subsidiary CSI Solar Co., announced the launch of SolBank 3.0, the latest iteration of its utility-scale energy storage system. SolBank 3.0 provides power up to 2.35 MW and capacity of 5 MWh.

What types of energy storage are available in Canada?

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability and power quality, and by complementing variable renewable energy sources (VRES) like wind and solar.

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.

When did energy storage start in Canada?

The first energy storage project in Canada, the Sir Adam Beck Pump Generating Station, came online in 1957. However, the next project did not come online until 2013. There are three main types of energy storage currently commercially available in Canada:
