# Solar container lithium battery internal energy storage cabinet principle

## Overview

---

What is the difference between a battery rack and a container?

The battery rack consists of the required number of modules, the Battery Management Unit (BMU), a breaker and other components. The container consists of the required number of the battery racks, as well as air conditioning and fire extinguishing equipment.

What are the characteristics of a lithium ion battery?

The lithium-ion battery has the characteristics of low internal resistance, as well as little voltage decrease or temperature increase in a high-current charge/discharge state.

What is a battery rack?

The module consists of eight of our lithium-ion battery cells and the Cell Monitoring Unit (CMU) as shown in Figure 1. The battery rack consists of the required number of modules, the Battery Management Unit (BMU), a breaker and other components.
