## Overview

---

Are charging piles the future of smart energy?

Domestically, the charging pile industry is evolving from a simple energy supply facility into a critical node in the smart energy ecosystem. With the maturation of technologies like V2G and distributed energy, charging piles will become a key component of future smart grids.

Are homegrown charging piles for new energy vehicles a big deal?

[XIE SHANGGUO/FOR CHINA DAILY] Global interest in homegrown charging piles for new energy vehicles has ballooned as China cements its leading position in the global NEV market with exports set to almost double this year, experts and industry executives said.

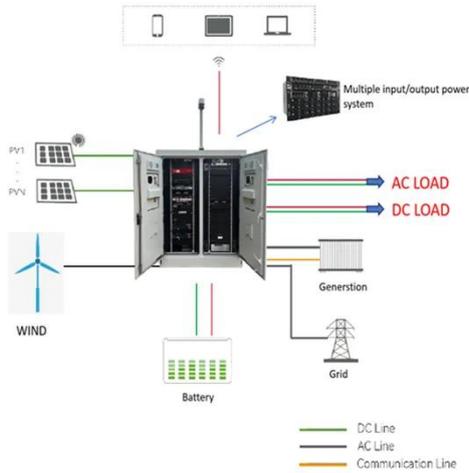

What is a charging pile?

The function of charging piles is like that of tankers in gas stations. Charging piles can be fixed on the ground or wall and installed in public buildings, residential parking lots or public electric car charging stations. They can be used to charge various types of electric cars according to different voltage levels.

Are Chinese charging pile companies accelerating global expansion?

Chinese charging pile companies are accelerating their global expansion. In 2023, companies such as Star Charge and Wanbang New Energy saw overseas orders in Europe and Southeast Asia grow by over 150% year-on-year.

## Solar energy storage charging pile production enterprise

### China leads world in providing charging piles

The company's charging pile for household use, equal to the size of an electronic scale, can recharge a car in four to seven hours, Li ...
