Solar energy storage policy foreign trade wholesale

Overview

How much battery storage does the world have in 2024?

In 2024, the world added 77GW of battery storage, a 75 per cent jump from the previous year, with nearly 80 per cent of it built for large-scale renewables, according to the IEA. Renewable energy company Masdar plans to build a solar plant in Abu Dhabi that will rely on a 19 gigawatt hours battery system to stabilise its solar power © Masdar.

How do renewables affect wholesale electricity prices?

The rapid rise of renewables, particularly wind and solar, has increased volatility in wholesale electricity markets. Daytime oversupply depresses prices — often into negative territory — while evening demand spikes have become sharper.

How does oversupply affect solar prices?

Daytime oversupply depresses prices — often into negative territory — while evening demand spikes have become sharper. A relatively mature market, especially in Europe, has become more competitive, said one European asset owner, raising pressure on solar owners and operators to deliver more predictable returns.

Should European batteries be sourced from China?

One European battery maker said it would have to switch some of the components that it was sourcing from China to other parts of Asia, adding that sourcing purely from the US would be difficult. Jones of Ember argues that the fundamental solar trend remains strong, despite political interventions.
