

## EQACC SOLAR

# Solar folding container

## Overview

---

How do foldable solar panels work?

the foldable photovoltaic panels are tucked inside a mobile solar container. The mobile solar container can take up to five hours to assemble and make it operational. Its base is made up of a solid floor frame, and mounted on this frame is the photovoltaic panels' rail system and the folding mechanism.

What is a solarfold container?

The solarfold Container is an immaculately-detailed and sophisticated plug & play system for a wide range of applications. The mobile drive system consists of a flexible drive unit mounted on traverses and can also be used for other solarfold PV power plants.

What is a solarcontainer?

The Solarcontainer is a mobile system that can be used for both on- and off-grid purposes, including rescue missions and gatherings. the foldable photovoltaic panels are tucked inside a mobile solar container. The mobile solar container can take up to five hours to assemble and make it operational.

What is a mobile solar container?

The Austrian energy company SolarCont has developed a mobile solar container that stores foldable photovoltaic panels for portable green energy anywhere.

## Solar folding container
