# Solar grid-connected box glass installation

## Overview

---

How do I install a grid connect box?

Insert the control cables into the Grid-Connect-Box (see Section 9.3, page 25). Connect the control cables to the spring-cage terminals (see Section 9.4.2, page 27). Ensure that the insulated conductors are firmly in place. □ All installation work must be completed. Ensure that the power cables are secured with a strain relief.

What is a grid connect box?

• Parameter • Connect the line conductors to the • . SMA Solar Technology AG  
2 Safety 2 Safety 2.1 Intended Use The Grid-Connect-Box is an automatic transfer switch which enables the safe operation of the utility grid and an electricity generator as energy sources of an SMA multicluster system.

What type of grid do I need for a grid connect box?

If the Grid-Connect-Box is used with all-pole disconnection, the utility grid must be either a TN-S, TN-C-S or TT system. If the Grid-Connect-Box is used without all-pole disconnection, the utility grid must be a TN-C-S system (for grounding in the multicluster system, see the Multicluster-Box operating manual).

Can a grid connect box be used without all-pole disconnection?

If the Grid-Connect-Box is used without all-pole disconnection, the utility grid must be a TN-C-S system (for grounding in the multicluster system, see the Multicluster-Box operating manual). Do not exceed the maximum AC connection power of the Grid-Connect-Box. Cables with copper conductors must be used for the installation.
