

EQACC SOLAR

Solar inverter gprs communication module

Overview

Does Solarman stick logger support GPRS?

SOLARMAN PV stick logger supports GPRS, WiFi, 4G, stick logger can run a long-term and efficient monitoring of PV system. SOLARMAN stick solar data logger supports GPRS, WiFi, 4G, Ethernet and other communication method. It also supports RS485/RS232/TTL/USB and other serial communication. Contact SOLARMAN to buy data logging stick now!.

What communication methods does Solarman stick logger support?

SOLARMAN stick logger supports GPRS, WiFi, 4G, Ethernet and other communication method. Furthermore, stick logger supports RS485/RS232/TTL/USB and other serial communication. With the design of multi-cover, it adapts to a vast majority of inverters.

What are the characteristics of different communication methods of inverters?

The characteristics of different communication methods of inverters are obvious, and the application scenarios are different. In order to better weave the underlying network of energy digitization and intelligent development, choose the most appropriate communication method according to local conditions.

How does a low voltage inverter work?

The data signal is connected to the low-voltage busbar through the power line on the AC side of the inverter, the signal is analyzed by the inverter supporting the data collector, and the communication is finally connected to the local power station management system or the cloud platform through the LAN or the Internet 2. Application scenario 4.

Solar inverter gprs communication module

Stick Logger Inverter Company, Supplier , Deye Inverter ...

Stick logger supports GPRS, WIFI, 4G, Ethernet and other communication modes. Its bluetooth function enables local debugging configuration to collect operation and power generation data ...
