Does ASEAN have a solar PV system?

A decade of solar PV deployment in ASEAN: Policy landscape and recommendations. Energy Reports, 8, 460-469.

Where do Southeast Asia's Solar Exports come from?

Southeast Asia's solar exports have primarily targeted the US, with more than 80% of the equipment it imported in the first half of 2024 sourced from Malaysia, Vietnam, Thailand and Cambodia, according to BloombergNEF. But this successful run is now under threat.

Why is Southeast Asia a top exporter of solar power equipment?

In little over a decade, Southeast Asia has become one of the world's top exporters of solar power equipment – a success driven significantly by the relocation of Chinese manufacturers to the region. But now, the sector faces considerable challenges as US tariffs cut off their main export market, intensifying pressure on a previously booming trade.

Is PV module manufacturing in Southeast Asia under pressure?

Thanks to new data, this edition includes entries such as ICA Solar and United Renewable Energy (URE), reflecting the evolving landscape of PV manufacturing in the region. Despite strong ambitions, PV module manufacturing in Southeast Asian is currently under pressure.
