Solar modules exported to North America

Overview

Are solar panels exported to the United States?

Commerce examined a complaint alleging that eight solar companies that manufacture solar cells and modules are manufactured the components in the PRC, then sending those cells and modules to Cambodia, Malaysia, Thailand, and/or Vietnam for minor processing before being exported to the United States.

What is the sinovoltaics supply chain map - North America for Q2 2024?

JThe Sinovoltaics Supply Chain Map (SSCM) - North America for Q2 2024 includes several notable changes for the US solar market since our Q1 report, emphasizing the importance of supply chain traceability. Several new solar panel manufacturers and related PV factories have been added.

How many solar panels did the US import in 2024?

The United States imported approximately 14 billion U.S. dollars worth of solar PV modules between January and October 2024. Almost 40 percent of these solar panels imported into the U.S. during this period came from Vietnam.

What percentage of solar panels are imported from Vietnam?

Almost 40 percent of these solar panels imported into the U.S. during this period came from Vietnam. In 2012, the Obama administration implemented duties on solar equipment imported from China to counteract the competitive edge held by foreign companies.
