**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

The image shows a white rectangular Energy Storage System unit with a green horizontal stripe. The words 'ENERGY' and 'STORAGE' are stacked vertically on the front panel, with 'SYSTEM' at the bottom. On the left side, there is a vertical metal grille and a small control panel with a few buttons and a display. On the right side, there is a vertical metal grille and a small control panel with a few buttons and a display.

## Overview

---

This detailed 2025 guide breaks down how much solar panels cost, what affects the price, how installation works, how much you save monthly, and how to choose the right solar setup for your home. How much do solar panels cost?

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type, and installer.

How much does a 6 kW solar panel installation cost?

The average 6-kW residential solar panel installation is \$17,852 before incentives. Learn about cost factors, financing options, tax breaks and more.

How much does a solar system cost per watt?

Pro tip: It can be helpful to know your solar price per watt before and after claiming the 30% tax credit. Ultimately, many factors figure into the price per watt of a solar system, but the average cost is typically as low as \$2.75 per watt.

What is the relative cost of solar energy?

Another measure of the relative cost of solar energy is its price per kilowatt-hour (kWh). Whereas the price per watt considers the solar system's size, the price per kWh shows the price of the solar system per unit of energy it produces over a given period of time. Net cost of the system / lifetime output = cost per kilowatt hour
