## Overview

---

What is a photovoltaic system?

Photovoltaic systems are used to directly convert solar energy into electrical energy. This cost-effective technology is already being used extensively in sun-rich desert regions and land areas. Pioneering components and systems from HYDAC enable you to increase your solar park's availability.

What is a photovoltaic power plant?

Based on decades of expertise in power plant technology. Photovoltaic systems are used to directly convert solar energy into electrical energy. This cost-effective technology is already being used extensively in sun-rich desert regions and land areas.

Who makes hydraulic manifold?

Expect for providing the design and production service of hydraulic manifold, we can manufacture the hydraulic system whose components all come from international famous companies, such as ABB, SUN, Rexroth and so on. Successsun provides standard and custom hydraulic manifold which is a hydraulic component used to regulate the flow of fluid.
