Solar panels for home roofs

Overview

What is a solar panel roof?

When we talk about solar panel roofs, we usually picture traditional solar panels mounted on the roof, capturing sunlight through photovoltaic cells and converting it into electricity. However, there's also another option: solar roof tiles also called solar shingles.

Can solar panels be installed on a roof?

In-roof installations allow the solar panels to be mounted as part of the roof structure, similar to a velux window. Solar tiles are also an option for a domestic roof, replacing the existing tiles.

How do I choose a solar panel for my home?

Site Assessment: A professional should assess the home's location to ensure it receives adequate sunlight throughout the year. Obstructions such as trees or buildings that may cast shadows should be considered. Solar Panel Type: Choose between monocrystalline or polycrystalline panels.
