## Overview

---

Can Morocco generate 20 GW of solar energy?

Feasibility studies released in April 2024 suggest Morocco could ultimately generate up to 20 GW of solar energy, positioning the country as a major exporter to Europe via undersea cables. Domestic demand is also growing, with Morocco's industrial sector pledging to source at least 40% of its energy from renewable sources by 2027.

Will Morocco become Africa's solar energy pioneer?

Morocco's exceptional solar resources, reaching 2,264 kWh/m<sup>2</sup>/year in southern regions, position the country to become Africa's solar energy pioneer, new SolarPower Europe report reveals. Morocco's solar power capacity could surge from 0.32 GW to 4.35 GW by 2028.

Why is Morocco focusing on solar energy?

Thanks to its high solar potential, it is predictable that Morocco's effort will be focused on this field: the Erasmus plus INNOMED project is a virtuous example of international cooperation, aiming at promoting solar energy through capacity building and the creation of solar energy networks, in synergy with EU Partners. 1. Introduction.

Will Morocco be able to generate 52% of its electricity by 2030?

Morocco is making headlines for its bold leap into the solar energy frontier, setting out to generate over 52% of its electricity from renewables by 2030. As of early 2025, fresh figures from the Moroccan Ministry of Energy show that solar energy alone now accounts for around 20% of the nation's total electricity production.
