Solar panels installed on Jerusalem tiles

Overview

Should Israel put solar panels on its roofs?

By Steven Scheer JERUSALEM (Reuters) - Israel is turning to its citizens to help produce electricity and profit from it as demand grows rapidly by putting solar panels on their roofs to take advantage of the sun as a key natural resource.

Does Israel have solar panels?

Most homes and apartments across Israel already have solar panels on roofs to heat water. At 3% annual growth in energy use, Israel is among the highest of Western countries, making it doubly important to keep up with demand while boosting the level of renewables in its energy mix.

Will a solar roof help reduce electricity bills?

"We want to encourage citizens and local authorities to install solar roofs," said Yossi Dayan, the ministry's director general, adding the move would help reduce electricity bills. "A solar roof provides energy security for the family in times of emergency and maintains a green and clean environment."
