Solar panels placed at home

Overview

How to install solar panels at home?

It is important to follow the correct procedure to install solar panels. Here are the steps for installing solar panels at home: The mounting structure is the skeleton of your solar system. It must be galvanised so that it can resist corrosion. In our blog, we have covered everything about the different types of mounting structures.

Are solar panels easy to install?

Installing solar panels is usually relatively quick and straightforward, but it's still worth getting to know all the ins and outs of how it happens. After all, considering how much solar panels cost, it makes sense to understand the process.

Can you install solar panels above a roof?

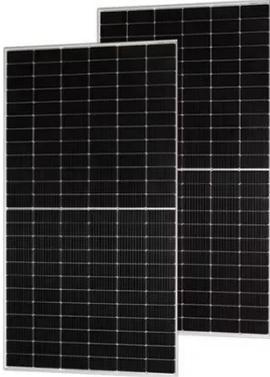

If you move ahead, make sure you stay within planning permission guidelines. Your panels must not stick out more than 60cm from the roof's surface, and no part of the installation can be more than four metres above the roof. Can you install solar panels on the ground?

.

Can you install solar panels on the ground?

You can install ground-mounted solar panels, though you'll again need more space than you would if you installed panels on a pitched roof. This is because you'll need to space out your panels so they don't cast shade on each other, just like on a flat roof.
