

EQACC SOLAR

Solar panels with skylight glass

Overview

How does a solar skylight system work?

The discreet solar panel captures available daylight to power the skylight, and the built-in rain sensor automatically closes the skylight at the first sign of inclement weather. Breathe easy knowing your skylight system options.

What is solar powered Fresh Air skylight system?

Explore your options and get personalized recommendations. Refresh and revitalize spaces with the power of the sun. Solar Powered Fresh Air Skylight Systems bring in daylight and fresh air to awaken the home and balance it with nature's rhythm.

What is a photovoltaic skylight?

Skylights, also known as roof lights or daylighting windows, enhance interior spaces with natural light and ventilation. Our Photovoltaic Skylight -or energy-generating skylights - does more than bring daylight indoors. It generates clean, renewable energy while offering bioclimatic properties for improved thermal comfort.

Are solar skylights a good idea?

By integrating these solar skylights into your design, you not only reduce CO₂ emissions and greenhouse gases but also lower the building's carbon footprint. Reaching energy efficiency and promoting a more sustainable future. Photovoltaic skylights generate free electricity while allowing natural light to enter.

Solar panels with skylight glass

Skylights and Solar Panels: A Sustainable Duo

When skylights and solar panels work together, everything falls into place. Natural light reduces the need for artificial lighting, and solar energy supports ventilation and climate control. A ...
