

## EQACC SOLAR

# Solar power generation system reinstallation

## Overview

---

What is the difference between removal and reinstalling solar panels?

Removal is the process of temporarily removing solar panels or the entire system from your home. Reinstallation is the process of reinstalling solar panels after reroofing, remodeling or relocation.

How do I reinstall my solar panels?

Note: You are responsible for providing a safe location to store your solar panels while they are removed from your roof. After your roof work is complete, submit the reinstallation request from the Tesla app to begin the reinstallation of your solar panels. Tap 'Support' at the bottom of your energy system home screen.

Do you need a contractor to remove or reinstall solar panels?

For some removal and/or reinstallation services, such as for customers with Zep hardware, a contractor may require proprietary tools to remove and reinstall the solar panels and new mounting hardware. Let us know if you hire a contractor to complete this work, and we will send you instructions through email for ordering these tools and parts.

How do I get my solar panels removed from my roof?

In the Tesla app, tap 'Support' at the bottom of your energy system home screen. Select 'System Removal' to schedule a service visit. While we aim to provide convenient scheduling, removal timelines may vary based on crew bandwidth and availability. Removal process begins. We begin the removal of your solar panels from your roof.
