

EQACC SOLAR

Solar power station for home in Tunisia

Overview

Does Tunisia have a good solar energy potential?

Tunisia has very good solar radiation potential which ranges from 1800 kWh/m² per year in the North to 2600kWh/m² per year in the South. Tunisia has 1,800MW of solar energy potential which is until now yet to be harnessed.

Why should you invest in solar power in Tunisia?

Nur Energie has built and maintained a solar weather station for 3 years on the TuNur site to receive real time solar data on the ground. Tunisia has up to 20% better radiation than some of the best sites in Europe, and the Sahara desert provides significant land to develop large scale solar power projects.

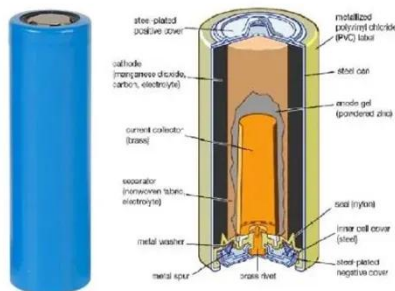

Will TuNur use concentrated solar power in South West Tunisia?

TuNur plans to use Concentrated Solar Power to generate a potential 2.5GW of electricity on 100km² of desert in South West Tunisia by 2018. At present the project is at the fund-raising stage.

What is TuNur energy doing in Tunisia?

In Tunisia, Nur Energie is developing the world's first CSP solar export project between North Africa and Europe. For more information about the TuNur project please visit the TuNur company website:
