

**EQACC SOLAR**

# **Solar power station generator 80 kilowatts**

## Overview

---

What is a 80 kW solar system?

These 80 kW size grid-connected solar kits include solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans and instructions. These are complete PV solar power systems that can work for a home or business, with just about everything you need to get the system up and running quickly.

How much space does a 80kW Solar System need?

A 80kW Solar Kit requires up to 5,700 square feet of space. 80kW or 80 kilowatts is 80,000 watts of DC direct current power. This could produce an estimated 9,000 kilowatt hours (kWh) of alternating current (AC) power per month, assuming at least 5 sun hours per day with the solar array facing South.

How much does an 80 kW solar system cost?

Compare price and performance of the Top Brands to find the best 80 kW solar system. Buy the lowest cost 80 kW solar kit priced from \$1.10 to \$1.90 per watt with the latest, most powerful solar panels, module optimizers, or micro-inverters. For home or business, save 26% with a solar tax credit.

What is a solar generator?

The Solar Generator is classified under our comprehensive Solar Energy System range. Manufacturers who produce solar energy systems in bulk benefit from economies of scale, allowing for cost-efficiency in production and lower per unit costs.
