Solar power system prices in Lithuania

CE UN38.3 

Overview

Home solar systems typically range from \$6 to \$12 per square foot of living space. The actual cost may vary based on the size and electricity consumption. How much does electricity cost in Lithuania?

In June 2024, the average wholesale electricity price in Lithuania increased to approximately 91.6 euros per megawatt-hour. Between January 2021 and August 2022, electricity prices in the Baltic country grew roughly nine-fold due to the global energy crisis, surpassing 480 euros per megawatt-hour in the latter month.

Is Lithuania a good country for solar energy?

Lithuania has been significantly expanding its solar parks, growing from zero in early 2000s to 814 MW capacity in 2022. Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy.

Does Lithuania need a new energy system?

Lithuania imports a large share of its electricity needs, while bioenergy is taking the lead in domestic energy supply. By 2030, Lithuania wants to reduce its electricity imports by half and produce 70% of its electricity needs from domestic sources. It plans to complete its synchronisation with the continental European power system by early 2025.
