Solar power with grid backup in Lisbon

Overview

How is solar energy driving the energy transition in Portugal?

Photovoltaic solar energy is driving the energy transition in Portugal with large-scale plants and new grid challenges. Portugal is making progress in solar photovoltaic energy with major projects such as Sonnedix Douro, with a capacity of 150 MW.

Why should Portugal invest in solar energy?

The sector emphasizes the importance of investing in the national electricity grid and new storage technologies. The goal is to double Portugal's installed capacity by the end of 2025, strengthening the country's role in renewable energy generation. Portugal is experiencing a key moment in the development of photovoltaic solar energy.

Is Portugal making progress in solar photovoltaic energy?

Portugal is making progress in solar photovoltaic energy with major projects such as Sonnedix Douro, with a capacity of 150 MW. The sector emphasizes the importance of investing in the national electricity grid and new storage technologies.

Where will Galp install a Bess solar PV plant in Spain?

In Spain, Galp will install a 14MW/28 MWh BESS at a solar PV plant in Manzanares, in the Castilla-La Mancha region. The operation and optimization of the BESS projects will be directed by Galp's Control Center, a dispatch centre approved by REN and REE, in Portugal and Spain, respectively.
