# Solar powered air conditioning

## Overview

---

What is a solar-powered air conditioner?

A solar-powered air conditioner uses solar panels to generate energy that keeps your home cool. We'll touch on everything about solar air conditioners in this article.

What is a solar air conditioner?

A solar air conditioner is an appliance that uses solar energy for air conditioning. It is an excellent solution for hot and humid climates and can be a savior where electricity supply is short due to frequent power outages. A solar air conditioner is intended to overcome these apparent issues.

How much energy does a solar air conditioner use?

If you have an HVAC zoning system with a solar-powered mini split AC, these usually use 500 to 700 watts of energy per hour per zone. Most home solar panels make 250 to 400 watts of energy per hour. So, to power most solar air conditioners, you'd need at least two solar panels. For central air conditioning, power is measured in tons.
