

EQACC SOLAR

Solution to the inverter room of Rabat solar container communication station

Overview

What is MV-inverter station?

highlight of this chain is the MV-inverter station, which comprises the switchgear, transformer, and inverter. With its broad portfolio of switchgear, Siemens offers the right solution for any application – reliable and maintenance-free, for any climate.

What is a proinsener solar inverter station?

Proinsener Solar inverter stations are designed and integrated specifically for each project. It is an easily installable and compact product perfect for generating solar power on a large scale. All this allows easy and quick field connection to the medium voltage transforming station (MV), which reduces transport and installation costs.

How a photovoltaic inverter station works?

In each inverter station all of the necessary equipment is integrated to connect to the medium voltage network of the photovoltaic plant, always complying with the standards of performance and quality required according to the project and its location.

Solution to the inverter room of Rabat solar container communication

Inverter Stations

Proinsener Solar inverter stations are designed and integrated specifically for each project. It is an easily installable and compact product perfect for generating solar power on a large scale. All ...

MV-inverter station: centerpiece of the PV eBoP solution

Medium-voltage transformers
siemens / pvebop
A reliable partner for the entire lifecycle
Smart power distribution: PV power distribution in perfect balance
Bundled power: the combiner box
Efficient power supply solution: E-House
SIESTORAGE Interface to all stakeholders: monitoring & control center
The combiner box combines the output of multiple PV modules, protects the electrical components, and forwards important data and measured values. It's also extraordinarily robust and is suitable for use in the most demanding climatic environments.
