Somaliland Household Solar Power Generation System

Overview

How much solar energy does Somalia use?

Based on the current installed energy capacity in Somalia, solar energy contributes approximately 11.9% of total power generation in the country and is expected to increase in the upcoming years.

Can Somalia harness solar energy?

This study explores Somalia's energy profile and the potential for harnessing solar energy. The installed photovoltaic capacity was found to be 41 MW and contributed 11.9% of the total electricity generation. A case study on a solar power microgrid system in Bacadweyene, Somalia, is also presented.

Can solar energy reduce energy costs in Somalia?

The simulation results using PVGIS revealed that the solar PV installation in Somalia produced two-fold the energy amount compared to PVs installed in Germany. Hence, RE, such as solar energy, can reduce electricity costs and the negative environmental impacts .

What is the energy supply in Somalia?

Energy supply Somalia's energy capacity is around 344 MW, mainly generated from imported diesel fuel. However, some ESPs have installed grid-connected solar PV systems. In Table 3, Energy supply and tariffs in the Federal Member States have seen a 36% yearly increase in the past six years.
