

# South African lithium titanate battery energy storage container price

## Overview

---

A typical 20-foot container system (about the size of two elephants standing nose-to-tail) storing 1-2 MWh currently costs between \$300,000 to \$600,000. How much does a lithium titanate battery cost?

Though the price varies, the average cost of the battery per kWh is \$650-\$790. A 40Ah LTO battery will cost roughly \$30-\$40, a 4000Ah will cost \$600-\$700, and containerized systems will cost up to \$70,000. Hence, due to this huge amount, it is safe to say that the lithium titanate battery is costly.
