Spanish wind power storage policy

Overview

What does the European Commission say about energy storage in Spain?

La Moncloa. 17/03/2025. European Commission approves new 700 million aid scheme to boost energy storage in Spain [News] The Ministry of Ecological Transition and Demographic Challenge will promote the large-scale deployment of this technology by co-financing investments of up to 85%.

Will Spain be able to deploy large-scale electricity storage?

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal.

How can Spain transform its energy system into a climate-resilient country?

To ease financing, beneficiaries may request advance payments of up to 100% of the awarded aid, provided certain conditions are met. These efforts are part of a broader strategy to transform Spain's energy system into one that is more flexible, robust, and climate-resilient.

What will Spain's energy plan look like in 2030?

By 2030, Spain expects to install 22.5 GW of energy storage projects, including included battery energy storage, pumped hydropower and solar thermal plants. The plan also aims for 76 GW of solar power, 62 GW of wind power, which includes 3 GW of offshore wind, along with 1.4 GW of biomass projects.
