Stockholm Power Plant Energy Storage Project

Overview

Who is Stockholm exergi?

Stockholm Exergi is a Swedish energy company that runs a woody biomass-powered combined heat and power plant in Stockholm. They are planning to use a Bioenergy with Carbon Capture and Storage (BECCS) facility at the plant in 2027, with a final investment decision expected at the end of 2024.

How does Stockholm exergi's BECCS plant work?

Stockholm Exergi aims for their BECCS plant to become more efficient than previous CCS projects and pilots by coupling a heat pump to the CCS installation, thereby recuperating the heat generated at each step of the process to feed into the city's district heating network.

When will a battery energy storage system be built in Sweden?

Construction has begun on Sweden's largest Battery Energy Storage System (BESS) undertaken by Neoen, an Independent Power Producer and Nidec, a system integrator. The project has been projected to come online in early 2025. Neoen is headquartered in Paris.

What is the largest battery energy storage system in Sweden?

Named Isbillen Power Reserve, the 1-hour duration Battery Energy Storage System project will be the largest in Sweden and the largest in the Nordics by megawatt (MW) power. The largest by megawatt-hours energy capacity in the Nordics will be a 2-hour project in Finland that Neoen recently started building.
