## Overview

---

What is the difference between a supercapacitor and an electrolytic capacitor?

Electrolytes with organic solvents are more expensive but can give a higher capacitor voltage of 2.7V. Supercapacitors are used in vehicles for regenerative braking. They have much higher power densities than batteries and can charge and discharge more rapidly. They also store much more energy as compared to conventional electrolytic capacitors.

Where can I buy electrolytic capacitors?

Leading brands include TruCap, Forever and NIC electrolytic capacitors and are despatched the same day. If you are looking for higher capacitance from your high current or low frequency application, buy electrolytic capacitors from Rapid. Buy a wide range of Electrolytic Capacitors from Rapid Online. Free UK delivery on orders over £20.

How much does a super capacitor cost in Australia?
