

**EQACC SOLAR**

# **Supercapacitor carbon manufacturer**

## Overview

---

Who makes supercapacitor activated carbon?

The global core manufacturers of Supercapacitor Activated Carbon include Kuraray, Power Carbon Technology and Haycarb. The top three companies have a market share of about 67%.

What is the market share of supercapacitor activated carbon?

The top three companies have a market share of about 67%. The Asia-Pacific region is the world's largest Supercapacitor Activated Carbon market with a market share of about 64%, followed by North America and Europe with a market share of 18% and 11%, respectively.

How does a supercapacitor work?

A supercapacitor uses a composite of different carbon materials, including an extremely high surface area, high purity activated carbon to store electrolyte within its porosity. This electrolyte can rapidly be charged with electrons as the spent energy is recovered, and hold it with minimal leakage and a capacity far in excess of its own mass.

What is the global supercapacitor market?

Supercapacitors, also known as ultracapacitors, are becoming a critical component in modern energy storage solutions. According to Statistics MRC, the Global Supercapacitor Market is accounted for \$5.08 billion in 2024 and is expected to reach \$11.16 billion by 2030 growing at a CAGR of 14.0% during the forecast period.
