# Surabaya Wind Power Generation System Indonesia

## Overview

---

Where can I find information about wind power development in Indonesia?

Renewable Energy Journal UNDIIP. 13. Ministry of Energy and Mineral Resources & PLN. Official reports on wind power development targets and implementation in Indonesia 2021-2025. 14. Indonesia.go.id. (2024). Exploring Wind Potential: Indonesia's Steps Toward Renewable Energy. 15. KBR.id. (2021). This Year, PLN Builds First Wind Power Plant in Java.

How to accelerate wind energy adoption in Indonesia?

In addition, simpler and more transparent regulations in the licensing process are also needed to accelerate the adoption of wind energy in Indonesia. The implementation of the PLTB project will be more effective if combined with more stable power plants such as hydroelectric power plants (PLTA) or geothermal power plants (PLTP).

What is Indonesia's wind energy potential?

It is understood that Indonesia has a significant amount of renewable energy (including wind energy) potential which can be utilized to fulfill the nation's demand for electricity. According to BBSP KEBTKE, the wind energy potential of Indonesia amounts to 155 GW, consisting of 60.6 GW onshore wind and 94.2 GW of offshore wind.

Can wind turbines be used as power plants in Indonesia?

Wind turbine development in Indonesia is undergoing a continuous increase to meet renewable energy targets. The potential for wind energy in all 34 provinces has been mapped, while identifying areas with wind speeds of at least 4 m/s. The next step is to strategically implement wind turbines as power plants in these locations.
