Swedish solar container battery customization

Overview

Is Axpo launching a large-scale battery storage facility in Sweden?

12.02.2024 - The commissioning of Axpo's first large-scale battery storage facility in Sweden, announced today, marks the latest milestone in the expansion of its battery business. The 20MW/20MWh plant, connected to the electricity grid by local energy company Landskrona Energi, follows several projects in Switzerland and Europe.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

What is the new lithium-ion based battery storage facility?

The new facility was officially inaugurated on 12 February 2024 at a ceremony attended by representatives from politics and business. The new 20MW/20MWh lithium-ion based battery storage facility will be used to help balance electricity supply in the region and has been connected to the grid by Landskrona Energi, a local energy supplier.
